Nintendo®

2002 Annual Report

Nintendo Co., Ltd.

Dear Nintendo Shareholders,

Last year Nintendo launched the NINTENDO GAMECUBE and Game Boy Advance hardware systems and, in 2002, Nintendo is committed to expanding the worldwide sales of both products. Nintendo is not only a video game hardware manufacturer but also, with strong software development teams both inside and outside the company, an unparalleled game software publisher with the most respected track record in the world. The incomparable "know-how" we have accumulated throughout our history is manifested in these two new platforms.

We plan to expand the market by providing a variety of unprecedented, irresistible and high quality software titles that take advantage of the unique abilities of our new hardware platforms. This will include the new play style that is made possible by the connectivity between the NINTENDO GAMECUBE and Game Boy Advance.

Sincerely,

A handwritten signature in black ink that reads "Satoru Iwata". The signature is fluid and cursive, with the first name "Satoru" and last name "Iwata" clearly distinguishable.

Analysis of Operations and Financial Review

Overview

During the fiscal year ended March 31, 2002, the world-wide video game industry was impacted by the introduction of next generation hardware and software. In response, retail markets expanded reflecting acceptance of this new technology by consumers. As hardware performance improves, users' expectations increase, as well. During this period, Nintendo Co., Ltd. (the "Company") and its subsidiaries (together with the Company, "Nintendo") successfully launched NINTENDO GAMECUBE and GAME BOY ADVANCE. GAME BOY ADVANCE was launched in the Americas and the European markets, and NINTENDO GAMECUBE was introduced to the Japanese and the Americas markets.

GAME BOY ADVANCE, with an improved CPU and a wide LCD screen, delivers a much sharper picture than its predecessor GAME BOY COLOR. NINTENDO GAMECUBE is not only given enhanced power, but also designed to do what NINTENDO 64 could not do --- providing game creators with easiness to present new and creative ideas in software they write. Nintendo has focused on developing software for these machines that users will find the most innovative and best in the industry.

As a result, the Company reported consolidated net sales of ¥554.4 billion (\$4.2 billion) in the fiscal year ended March 31, 2002. This represents a 20% increase compared with the previous fiscal year. Net sales increased in Japan, the Americas, and Europe. This is mainly due to the release of NINTENDO GAMECUBE in Japan and the Americas, and the release of GAME BOY ADVANCE in Europe. The Company reported net income at ¥106.4 billion (\$800 million) due, in part, to increased sales and margins and foreign exchange gain resulting from the decrease in the yen value against foreign currencies. Net income was a historical record high for the second consecutive year.

Revenue and Expenses

Consumers responded well after the launch of GAME BOY ADVANCE in the Americas and Europe in June 2001. The software titles SUPER MARIO ADVANCE, WARIO LAND 4 and MARIO KART: SUPER CIRCUIT sold more than one million units each. By the end of March 2002, the life-to-date unit sales of GAME BOY ADVANCE hardware exceeded 18 million all over the world.

NINTENDO GAMECUBE, which was launched in Japan in September 2001, and in the Americas in November 2001, also delivered new and exciting interactive software to game players. PIKMIN, which provided a uniquely different game idea, gained popularity. SUPER SMASH BROS. MELEE and LUIGI'S MANSION were extremely popular and provided new gaming elements as well. Each of these titles sold more than one million units. The software title ANIMAL FOREST+ (ANIMAL CROSSING in the United States) which can be played through connecting NINTENDO GAMECUBE and GAME BOY ADVANCE, and CARD-E READER (E-READER in the United States) was released in Japan. It was an automatic hit and a good example of innovation that can provide gamers with a brand new "connectivity" experience. By the end of March 2002, NINTENDO GAMECUBE hardware sold a total of 3.8 million units.

During the fiscal year ended March 31, 2002, gross margin increased by 20% to ¥220.2 billion (\$1.7 billion). The gross margin ratio remained at 40% which is similar to the previous fiscal year. Selling, general and administrative expenses increased slightly to ¥100.6 billion (\$757 million). Operating income increased by 41% to ¥119.6 billion (\$899 million). Both interest income and foreign exchange gain decreased; interest income to ¥22.9 billion (\$172 million) and foreign exchange gain to ¥43.4 billion (\$326 million).

Cash Flow

At March 31, 2002, cash and cash equivalents increased by ¥77.1 billion (\$580 million).

Net cash provided by operating activities was ¥56.2 billion (\$423 million) which was ¥66 billion (\$496 million) less than the previous fiscal year, while net income increased. This was due principally to payments for income taxes.

Net cash used in investing activities was ¥5.1 billion (\$38 million) which was ¥17.9 billion (\$135 million) less than the previous fiscal year. This was due principally to payments for new production facilities.

Net cash used in financing activities consisted almost exclusively of the payment of dividends of ¥17 billion (\$128 million).

After giving effect of exchange rate changes on cash and cash equivalents of ¥43.2 billion (\$324 million), cash and cash equivalents was ¥863.1 billion (\$6.5 billion) at March 31, 2002.

Financial Position

Nintendo's financial position continues to be very strong.

At March 31, 2002, total liabilities were ¥218.6 billion (\$1.6 billion), and the current ratio was 4.89:1. The balance of cash and cash equivalents was 3.95 times total liabilities. Working capital improved by 13% to ¥825.6 billion (\$6.2 billion). Nintendo improved the number of days' sales in receivables to 33 days. Inventories were ¥43.9 billion (\$330 million). The number of days' sales in inventories was 29 days. Liabilities-to-equity ratio was 0.23:1 at March 31, 2002.

Common Stock Activity

The Company's stock price dropped by 4%, ending the year at ¥19,660 (\$147.82), while the Nikkei stock average declined by 15%. The Company increased its annual dividend level by ¥20 (\$0.15) to ¥140 (\$1.05) per share for Fiscal 2002. The dividend payout ratio was approximately 19%. Foreign shareholders constituted 37% of total outstanding shares at March 31, 2002.

Notes to Consolidated Financial Statements

Years ended March 31, 2002 and 2001

Note 1. Basis of Presenting Consolidated Financial Statements

The accompanying consolidated financial statements are prepared from the consolidated financial statements issued in Japan for domestic reporting purposes. Nintendo Co., Ltd. (the "Company") and its subsidiaries in Japan maintain their accounts and records in accordance with the provisions set forth in the Japanese Commercial Code and the Securities and Exchange Law, and in conformity with generally accepted accounting principles and practices in Japan, which are different in certain respects from the application and disclosure requirements of International Accounting Standards. Its overseas consolidated subsidiaries maintain their accounts in conformity with the generally accepted accounting principles and practices prevailing in the respective countries of domicile and no adjustment has been made to their financial statements in consolidation, as allowed under accounting principles and practices generally accepted in Japan.

The consolidated financial statements are not intended to present the consolidated financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Japan.

In preparing the accompanying consolidated financial statements, certain reclassifications have been made to the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan.

The consolidated financial statements presented herein are stated in Japanese yen, the currency of the country in which the Company is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥133 to US\$1, the approximate rate of exchange at March 31, 2002. These translations should not be construed as representations that the Japanese yen amounts have been, could have been or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

Note 2. Significant Accounting Policies

A. Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Company and all subsidiaries (total 24 both in 2002 and 2001) except for two. The equity method of accounting has been applied to one of the non-consolidated subsidiaries and to all affiliates (total 14 in 2002 and 16 in 2001) except for two. The remaining subsidiary and affiliates are immaterial and their respective investments are carried at cost in the accompanying consolidated balance sheets.

The principal consolidated subsidiaries and the principal affiliate for which the equity method of accounting was used for the year ended March 31, 2002 were as follows:

Consolidated subsidiaries	
Nintendo of America Inc.	Nintendo Australia Pty. Ltd.
Nintendo Benelux B.V.	Nintendo of Canada Ltd.
Nintendo España, S.A.	Nintendo of Europe GmbH
Nintendo France S.A.R.L.	
Affiliate	
The Pokémon Company	

Investment costs in excess of underlying net assets of consolidated subsidiaries and affiliates acquired are charged to income for the year as incurred.

All significant intercompany transactions, accounts and unrealized profits have been eliminated in consolidation.

The amounts of certain subsidiaries have been included on the basis of fiscal periods ended within three months prior to March 31.

Notes to Consolidated Financial Statements

Years ended March 31, 2002 and 2001

B. Translation of Foreign Currency Items

In accordance with the Japanese accounting standard, short-term and long-term monetary receivables and payables denominated in foreign currencies are translated into Japanese yen at the exchange rate in effect at the balance sheet date. The foreign exchange gains and losses from translation are recognized in the statements of income to the extent that they are not hedged by forward exchange contracts.

With respect to financial statements of overseas subsidiaries, the balance sheet accounts are translated into Japanese yen at the exchange rates in effect at the balance sheet date except for shareholders' equity, which are translated at the historical rates. The average exchange rates for the fiscal period are used for translation of revenue and expenses. The differences resulting from translation in this manner are included in "Minority Interests" and "Translation adjustments" which are listed in Shareholders' Equity in the accompanying consolidated balance sheets.

C. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, time deposit with an original maturity of three months or less, which can be withdrawn on demand and certain investments. Investments are defined as those that are easily accessible, with little risk of fluctuation in value and the maturity date is within three months of the acquisition date.

D. Financial Instruments

Derivatives

All derivatives are stated at fair value, with changes in fair value included in net profit or loss for the period in which they arise.

Securities

Securities are classified into four categories as follows.

Trading securities, which are held for the purpose of generating profits on short-term differences in prices, are stated at fair value, with changes in fair value included in net profit or loss for the period in which they arise.

Held-to-maturity debt securities are stated at cost after accounting for premium or discount on acquisition, which is amortized over the period to maturity.

Equity securities of non-consolidated subsidiaries and affiliated companies with equity method non-applied are stated at cost.

Other securities for which market quotations are available are stated at fair value. Unrealized gains on other securities are reported as "Unrealized gains on other securities" in Shareholders' Equity at a net-of-tax amount, while unrealized losses on other securities are included in net profit or loss for the period.

Other securities for which market quotations are unavailable are stated at cost, determined by the moving average method except as stated in the paragraph below.

In case where the fair value of held-to-maturity debt securities, equity securities issued by non-consolidated subsidiaries and affiliates, or other securities has declined significantly and such impairment of the value is not deemed temporary, those securities are written down to the fair value and the resulting losses are included in net profit or loss for the period.

Under the Japanese accounting standard, trading securities and debt securities due within one year are presented as "current" and all the other securities are presented as "non-current."

E. Inventories

Inventories are stated at the lower of cost, determined by the moving average method, or market.

F. Property, Plant and Equipment

Property, plant and equipment are stated at cost. The Company and its consolidated subsidiaries in Japan compute depreciation by the declining balance method over the estimated useful lives. The straight-line method of depreciation is used for buildings, except for structures, acquired on or after April 1, 1998. Overseas consolidated subsidiaries compute depreciation of assets by applying the straight-line method over the period of estimated useful lives. Estimated useful lives of the principal assets are as follows:

Buildings and structures: 3 to 60 years

G. Income Taxes

Deferred income taxes are recorded to reflect the impact of temporary differences between assets and liabilities recognized for financial reporting purposes and such amounts recognized for tax purposes. These deferred taxes are measured by applying currently enacted tax laws to the temporary differences.

H. Retirement and Severance Benefits and Pension Plan

The Company and certain consolidated subsidiaries are calculating the reserve for employee retirement and severance benefits with actuarially calculated amounts on the basis of the cost of retirement benefit and plan assets at end of fiscal year. Benefits under the plan are generally based on the current rate of base salary, length of service and certain other factors when the termination occurs.

Directors and corporate auditors customarily receive lump-sum payments upon termination of their services subject to shareholders' approval. The Company provides for the reserve for lump-sum severance benefits for directors and corporate auditors at the estimated amount required if all retired at the fiscal year-end.

I. Research and Development and Computer Software

Expenses relating to research and development activities are charged to income as incurred. Computer software for the internal use included in other assets is amortized using the straight-line method over the estimated useful lives.

J. Leases

All leases are accounted for as operating leases. Under Japanese accounting standards for leases, finance leases that are deemed to transfer ownership of the leased assets to the lessee are to be capitalized, while other finance leases are permitted to be accounted for as operating lease transactions if certain "as if capitalized" information is disclosed in the notes to the lessee's financial statements.

K. Appropriations of Retained Earnings

Appropriations of retained earnings are reflected in the consolidated financial statements for the following year upon shareholders' approval.

L. Amounts Per Share

The computations of net income per share of common stock are based on the weighted average number of shares outstanding during each fiscal year.

Cash dividends per share represent the amounts applicable to the respective years including dividends to be paid after end of the fiscal year.

Note 4. Derivatives

The Company has only forward exchange contracts and currency options within the limits of foreign currency deposit. The Company enters into derivative transactions for yield improvement of short-term financial assets, to reduce risk of exchange or interest rate fluctuations, but not for speculative purposes. Because the counterparties to these transactions are limited to high confidence level financial institutions and the transactions are short-term only, the Company does not anticipate any risk due to default. Derivative transactions are made only by the treasury department under approval by the president and a director in charge of those transactions.

The Company had the following derivative contracts outstanding at March 31, 2001.

Notes to Consolidated Financial Statements

Years ended March 31, 2002 and 2001

Note 10. Litigation

The Company and its consolidated subsidiaries are involved in matters of litigation, both as a plaintiff and as a defendant, and are subject to various claims or other contingent obligations, all arising in the ordinary course of business. Such litigation includes assertions relating to patent, copyright and trademark infringement and other matters.

While the ultimate outcome of these matters cannot be predicted at this time, it is the opinion of management that the disposition of all matters of litigation in which the Company and its consolidated subsidiaries are presently involved will not have a material adverse effect on the consolidated financial position of the Company.

Note 11. Subsequent Events

At the annual general meeting held on June 27, 2002, shareholders of the Company approved the year-end cash dividends and directors' bonuses proposed by the Board of Directors of the Company as follows:

	¥ Japanese Yen in Millions	\$ U.S. Dollars in Thousands (Note 1)
Year-end cash dividends, ¥80 (\$0.60) per share	¥11,333	\$85,209
Directors' bonuses	170	1,278

At the same meeting, the Company was authorized to acquire its own shares after June 27, 2002, upon resolution of the Board of Directors, to a maximum of 14,000 thousand shares at the purchase cost of less than ¥250 billion (\$1,880 million).

Note 12. Segment Information

A. Segment Information by Business Categories

Because the Company operates predominantly in one industry segment which accounts for over 90% of total net sales, operating income and assets, this information is not required.

B. Segment Information by Seller's Location
